

DESIGN TECHNOLOGY CURRICULUM

STATEMENT OF INTENT

At Three Peaks Primary Academy we intend to provide children with a broad and balanced curriculum providing a multitude of opportunities enabling them to design, make and evaluate their creations. We aim to fully equip children with creative skills to deal with tomorrow's rapidly developing world. Design and Technology offers children the opportunity to enhance their creativity through a variety of processes. Our curriculum delivers a chance to use creative thinking and practical activities to work towards mutual and tangible outcomes.

We consider Design and Technology to be an essential springboard in providing our children with a brighter future. We wish for our children to gain the all-important skills of teamwork, independence, perseverance, problem-solving and accountability with a view to developing the children into reflective, deep thinkers in regards to aesthetic, social and environmental issues.

In EYFS, we are committed to providing children with a variety of skills with a view to meeting Early Learning Goals in D&T. We aim to offer every opportunity throughout the age bands in order to provide children with key skills as they move to Key stage 1 & 2. Throughout Key Stage 1 and 2, we will implement a design, implement, evaluate structure to our Design and Technology curriculum which will give the children a basis to work from and allow us to view progression as the children move through the school.

The logo for Three Peaks Primary Academy is a large, stylized graphic. It features a purple triangle on the left side, which is partially overlaid by a grey circular shape. The grey shape has a vertical line through its center, creating a leaf-like or abstract form. The overall design is modern and geometric.
