

# Three Peaks Primary Academy

## Design and Technology

*At Three Peaks Primary Academy, we believe that Design and Technology should be an inspiring, rigorous and practical subject. Using creativity and imagination, pupils design and make products that solve real and relevant problems within a variety of contexts, considering their own and others' needs, wants and values.*

*The children at Three Peaks are taught to acquire a broad range of subject knowledge and draw on disciplines such as mathematics, science, engineering, computing and art. Pupils learn how to take risks, becoming resourceful, innovative, enterprising and capable citizens. Through the evaluation of past and present design and technology, they develop a critical understanding of its impact on daily life and the wider world.*

*High-quality design and technology education makes an essential contribution to the creativity, culture, wealth and well-being of the nation.*

# Design and Technology

## Aims of the Design and Technology Curriculum

The National Curriculum for design and technology aims to ensure that all pupils:

- develop the creative, technical and practical expertise needed to perform everyday tasks confidently and to participate successfully in an increasingly technological world
- build and apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users
- critique, evaluate and test their ideas and products and the work of others
- understand and apply the principles of nutrition and learn how to cook.

# Design and Technology

## Design and Technology in Early Years

During the Early Years Foundation Stage, the essential building blocks of children's design and technology capability are established. There are many opportunities for carrying out D&T-related activities in all areas of learning in the EYFS.

By the end of the EYFS, most children should be able to:

- Construct with a purpose in mind, using a variety of resources
- Use simple tools and techniques competently and appropriately
- Build and construct with a wide range of objects, selecting appropriate resources and adapting their work when necessary
- Select the tools and techniques they need to shape, assemble and join materials they are using

| <ul style="list-style-type: none"><li>• use the basic principles of a healthy and varied diet to prepare dishes</li><li>• understand where food comes from.</li></ul>                                                                                                                                                                                                     |

# Design and Technology

## Key Stage 2

Design and Technology National Curriculum Expectations – Key Stage 1. When designing and making, pupils should be taught to:

### Design

- use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups
- generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

### Make

- select from and use a wider range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing], accurately
- select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

### Evaluate

- investigate and analyse a range of existing products  evaluate their ideas and products against their own design criteria and consider the views of others to improve their work  understand how key events and individuals in design and technology have helped shape the world

### Technical knowledge

- apply their understanding of how to strengthen, stiffen and reinforce more complex structures
- understand and use mechanical systems in their products [for example, gears, pulleys, cams, levers and linkages]
- understand and use electrical systems in their products [for example, series circuits incorporating switches, bulbs, buzzers and motors]
- apply their understanding of computing to program, monitor and control their products.

Design and Technology National Curriculum Expectations – Key Stage 2. When learning about cooking and nutrition, pupils should be taught to:

- understand and apply the principles of a healthy and varied diet
- prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques
- understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed.

# Design and Technology

## Computing—Implementation

### **Approach – Knowledge**

At Three Peaks Primary Academy, Design and Technology is taught across each year group in modules that enable pupils develop in creativity, independence, judgement and self-reflection. Each module aims to activate and build upon prior learning, including EYFS, to ensure better cognition and retention. As a school we look to master practical skills relating to Design and Technology which involves developing the skills needed to make high quality products. Through this a child will design, make, evaluate and improve their creations allowing children to develop an understanding of design thinking and seeing their designs as a process. We also want children to take inspiration from design throughout history this will involves appreciating the design process that has influenced the products we use in everyday life.

### **Planning**

All modules have a sequenced overview outlining recommended number of sessions, key concepts, knowledge and vocabulary to be taught. All planning incorporates cooperative learning techniques, key vocabulary, core concepts and a class profile to enable all teaching staff to effectively plan and support the needs of all pupils in the classroom

Accompanying each module are knowledge notes which contains key vocabulary, information and concepts which all pupils are expected to understand and retain. They support vocabulary and concept acquisition through a well-structured sequence that is cumulative. Each Knowledge Note contains key vocabulary and key facts for the focus module

### **Knowledge Notes**

Knowledge Notes support vocabulary and concept acquisition through a well-structured sequence that is cumulative. Knowledge Notes are frequently dual coded to provide pupils with visual calls to aid understanding and recall.

### **Vocabulary**

Vocabulary forms a key part of our wider curriculum. Subject specific words are incorporated in each module and pupils are encouraged to develop their own 'Vital Vocabulary' lists along with dual coding to expand their science vocabulary repertoire

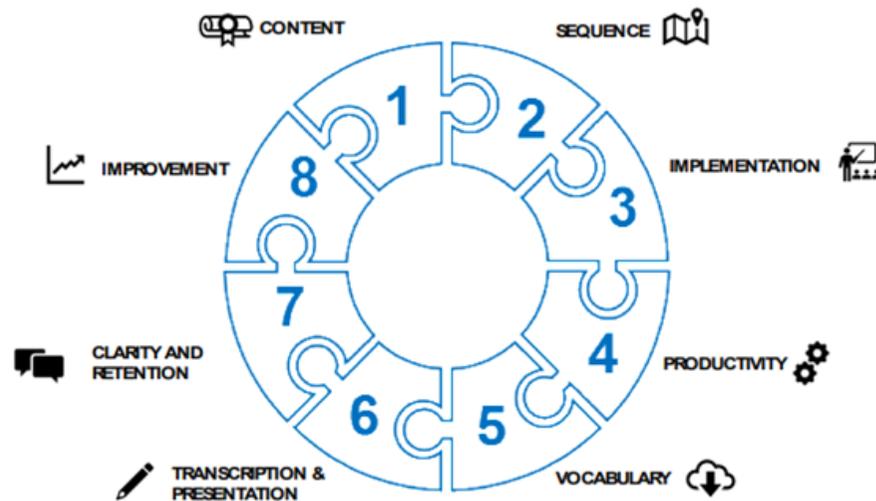

Impact will be assessed through :

### Pupil Book Study

Senior leaders and subject leaders regularly undertake book studies to monitor the effectiveness of teaching and learning. This includes sessions with small groups of pupils using questioning to check and ensure information and knowledge is acquired and understood with increasing confidence. Feedback is given to teaching staff to inform future planning.

QUALITY ASSURE books through studying:

### Ongoing Teacher Assessment

Teachers assess pupils throughout each session . Pupils who are identified as needing support will be supported either during post teaching interventions or in the following session as appropriate. Pupils working at above expected standard will also be identified and challenged appropriately to extend their learning. Evidence of this support or challenge and necessary feedback will be clear in books.
